

BTP Italia

Fifteenth Issuance – Term Sheet

Issuer	Republic of Italy
Issuer ratings	Baa3 / BBB / BBB / BBBH (Moody's / S&P's / Fitch / DBRS)
Issuance announcement	October 18 th 2019, with an Issuance Decree and a Press Release of the Ministero dell'Economia e delle Finanze (MEF) where the characteristics of the bond are described as well as the guaranteed minimum annual (real) coupon rate.
Guaranteed minimum annual (real) coupon rate	It is indicative and it is released in the Issuance announcement to facilitate the investment choices of investors. The definitive annual (real) coupon rate is set before the opening of the Second Phase of the placement ¹ period on the MOT and it cannot be below that level.
Maturity	8 years (October 28 th , 2027)
Structure	Bond indexed to Italian inflation (Indices of Consumer Prices for blue and white-collar households with the exclusion of tobacco, FOI ex-tobacco index)
- <i>Coupon: calculation methodology and payment</i>	<p>Semi-annual, indexed to the FOI ex-tobacco index of the semester, paid in arrears, and calculated by multiplying the real fixed semi-annual coupon rate (definitive annual real coupon rate/2) for the revalued principal.</p> <p>In case of deflation in a semester, the coupon for the same semester is calculated by multiplying the fixed semi-annual coupon rate for the nominal principal amount (floor on the coupon), thereby guaranteeing for the same semester a minimum return given by the semi-annual real coupon rate. In case of inflation during the following semesters, the revaluation of the principal will take place only if the index goes above the maximum level reached in the previous semesters.</p>
- <i>Principal revaluation: calculation methodology and payment</i>	<p>Paid semi-annually, based on the FOI ex-tobacco index, applied to the nominal principal purchased; it is paid together with the semi-annual coupon.</p> <p>In case of deflation in a semester, there is no payment due on the part of the investor at the end of the same semester. In case of inflation during the following semesters, the revaluation of the principal will take place only if the index goes above the maximum level reached in the previous semesters.</p>
- <i>Nominal principal redemption</i>	The nominal principal is reimbursed in a bullet format at maturity, at the nominal (face) value (therefore non-revalued).
Issue price	100 (at par)
